LOW RISK

Patient Summary

Age: 21 | Gender: Female

Clinical Assessment

Acute Headache expression

Treatment Plan

Medications: Prescribe standard symptom relief
Lifestyle: Rest and hydrate

Personalized Care Plan

Patient Hindhusha presents with Headache. Given their age (21), and low lifestyle risk, monitor closely for <1 day. Accounting for pre-existing: Migrane.

Recommended Tests

Basic vitals

Follow-Up Plan

1 week

Recommended Action

Routine care

Clinical Reasoning

Based on medium severity and <1 day duration, considering patient's low lifestyle risk and pre-existing Migrane.

Confidence Score 76%
